

To Whom it May Concern,

It has come to my attention that Licensure for Behavior Analysts is being reviewed in the state of Connecticut. As a resident of Stratford, Connecticut, I am in full support of passing this bill. I have friends with children who receive behavioral services and I feel that what these professionals do is very important for those families and therefore for communities as a whole.

I also feel that it would put our state in a better place for the professionals themselves since MA, RI, and NY have licensure laws.

It is my hope that my thoughts are considered. Thank you.
